

QAP 2 – JavaScript: Node.js

Student: **Amy Dalziel**

Date: Feb. 9, 2024

1. How many hours did it take you to complete this assessment? (Please keep try to keep track of how many hours you have spent working on each individual part of this assessment as best you can - an estimation is fine; we just want a rough idea.)

a. Approx. 4 hours

2. What online resources you have used? (My lectures, YouTube, Stack overflow etc.)

1. W3 Schools
2. Peter's classes
3. Videos posted by Peter (for async/await)
4. Peter's github
5. My github and notes from JS lectures

3. Did you need to ask any of your friends in solving the problems. (If yes, please mention name of the friend. They must be amongst your class fellows.)

a. No

4. Did you need to ask questions to any of your instructors? If so, how many questions did you ask (or how many help sessions did you require)?

a. No

5. Rate (subjectively) the difficulty of each question from your own perspective, and whether you feel confident that you can solve a similar but different problem requiring some of the same techniques in the future now that you've completed this one.

This assignment did not seem very difficult – as we covered the tasks needed over several lectures. It was enjoyable to use the knowledge I have acquired and put “my own spin” on the assignment. (I did not create the index.html file for this assignment – it is something I have been working on in my spare time. This seemed like a good opportunity to incorporate my own personal interests with the course material). I adjusted the code in class to allow the CSS, JPG and front-end JS files to work. I am not sure if my code is the most efficient way to do this; nevertheless, I enjoyed the challenge and extra practice.

Thank you for a wonderful semester so far.
